SATELLITE ROAD-NETWORK EXTRACTOR & CHANGE DETECTION DOSSIER

ALERT STATUS: [HIGH] - Secondary Paved Road Expansion / Bypass Extension

Dossier ID: DOSSIER-FA2116	**Target Sector:** Highway Expansion	**Coordinates:** 28.6139° N, 77.2090° E
New Roads Detected: 7 Segments	**Total New Length:** 0.336 km (336.48 m)	**New Road Footprint Area:** 575.5 m²

1. SATELLITE IMAGERY EVIDENCE & TACTICAL OVERLAY

Bi-temporal change map: Baseline roads displayed in cyan, newly constructed corridors highlighted in crimson red with skeleton centerlines.

2. VERIFIED NEW ROAD INCIDENT MANIFEST

Alert ID	Severity	Road Classification	Length (m)	Intersections	Confidence
NTRO-RD-670E74AF	MEDIUM	Secondary Branch Road	109.43 m	58	91.1%
NTRO-RD-F243A89D	LOW	Minor Spur / Track	48.25 m	35	90.5%
NTRO-RD-854AA081	LOW	Minor Spur / Track	46.58 m	28	90.5%
NTRO-RD-1DB2CB3F	LOW	Minor Spur / Track	36.09 m	24	90.4%
NTRO-RD-D09B903F	LOW	Minor Spur / Track	34.35 m	22	90.3%
NTRO-RD-8FB2B07C	LOW	Minor Spur / Track	31.76 m	24	90.3%
NTRO-RD-6AF7E7B5	LOW	Minor Spur / Track	30.02 m	16	90.3%

3. TACTICAL RECOMMENDATIONS & PROTOCOLS

- **Ground Truth Validation:** Dispatch high-resolution drone / UAV or aerial reconnaissance to confirm pavement grade.
- **GIS Integration:** Synchronize the exported GeoJSON vectors into national geospatial road registry databases.
- **Continuous Temporal Cadence:** Schedule 72-hour automated revisits to monitor lateral road spurs and secondary branching.
